NISE 1000

Asset and Business Security Management Solution for SMEs

Asset and Business Security Management Solution for SMEs

NISE 1000 is a comprehensive IT asset management solution that visualizes employee workflows through operation analytics to enhance productivity. It also provides comprehensive virus threat protection for PC terminals.

NISE 1000 Key Benefits

- **Business Analytics:**
Provides an intuitive view of internal and external PC activities—including work time, web usage, and application behavior—to enhance productivity and optimize business operations.
- **Peripheral Online Monitoring & USB Security:**
Detect online status of peripherals and mitigate risks from USB drives.
- **Output Monitoring:**
Visualizes and monitors PC actions that could lead to data leakage, enabling precise oversight to minimize internal information and operational risks.
- **Advanced Threat Protection:**
Vulnerability scanning, threat identification, real-time protection, and cloud-based unknown threat detection all covered to keep your system secure.
- **Automated Incident Handling and Response:**
Integrates with UTM for coordinated, automated security incident handling helping you improve security operational efficiency effectively.

NISE 1000 Key Features

Centralized Management

- NISE and NISG Series Remote Management
- Authorized Unified Monitoring and Management
- Centralized Management of Product Versions
- Automated Incident Handling and Response
- Multi-Tier Administration Account Management
- Two-Factor Authentication for nCloud Login

PC Business Analysis

- Internet Usage Statistics
- Application Usage Statistics
- PC Usage Time Statistics
- Print Monitoring
- USB File Operation Monitoring
- Business Visualization Presenta

Utilities

- Device Online Monitoring
- USB Storage Virus Protection
- Network Status Diagnosis
- Monitors PC screens and takes snapshots

Asset Management

- PC Information Collection
- Software Management
- Remote Desktop
- Vulnerability Management
- Security Policy
- Backup and Restore
- Threat Detection
- Account Management
- UTM Integration
- External PC Management
- Reporting

NISE 1000 Specifications

Hardware Specifications

Hardware	Description
Max Endpoints	200
USB	2 x USB 2.0
Console	1 x Console
Dimensions	173{L} x 200{W} x 38{H}(mm)
Weight	1.1kg
Interfaces	4 x GB Ethernet Rj45
AC Input	100-240V~, 50/60Hz
DC Output	12.0V $\overline{\text{---}}$ /5.417A 65.0W
Temperature	-10° C ~60° C (Operating)
Humidity	5~95%

Hardware Appearance

1 2 3

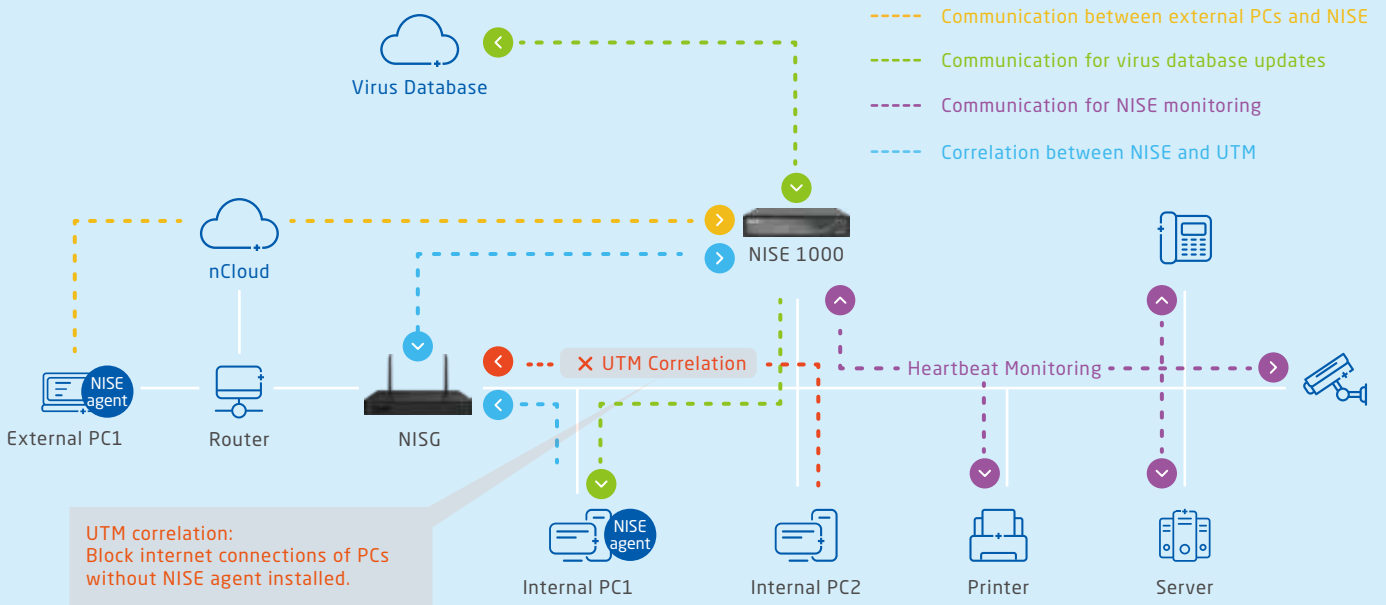

4 5 6 7

8

- 1 HDD LEDs
- 2 Power LEDs
- 3 Port LEDs
- 4 Power Connector
- 5 Power Swtch
- 6 Console Port
- 7 USB Ports
- 8 WAN/LAN Ports

NISE 1000 Scenario

Endpoint protection	Anti-malware, anti-ransomware, intrusion prevention, unauthorized access control, automatic isolation and removal of malware, Windows updates, USB/bluetooth control
Endpoint management	Collection of endpoint information on: 1) hardware and installed applications 2) resource (CPU, memory, storage) utilization 3) performance, running services, and network connections 4) startups and scheduled tasks Software management according to organization's restriction policy (whitelist/blacklist)
Endpoint operations	Restart, shutdown, network communication interruption, remote desktop connection Virus scan, software quarantine, software uninstall
Supported OS/ Required resources	NISE Agent Windows Windows 11/10/8.1/8/7 Windows Server 2022/2019/2016/2012/2008 Mac MacOS 10.13 (High Sierra) and above
